

# **PROTECTION AND HYGIENE CONCEPT**

## **ENGADIN BIKE GIRO | 10<sup>th</sup> to 12<sup>th</sup> of JULY 2020**

For the implementation of the Engadin Bike Giro, we have drawn up a catalogue of measures based on the specifications of the "Bundesamt für Gesundheit" (BAG) and "Swiss Cycling" in order to guarantee the safety and health of all participants in our event in the best possible way.

### **HEALTH DECLARATION**

All participants and the members/volunteers of the organization must confirm in writing (see page 2!) that there was no contact with infected COVID-19 persons within the last 14 days before the event. Furthermore, it must be confirmed that there are no typical acute respiratory diseases (e.g. cough, sore throat, shortness of breath), fever, muscle pain or suddenly occurring anosmia or ageusia (loss of sense of smell or taste). Accompanying persons may also only travel if the above symptoms do not apply.

### **STARTING DOCUMENTS / ACCREDITATION**

The collection of the start numbers is carried out at the Ski Service Corvatsch, Via Stredas 11, CH-7500 St. Moritz. Teams or groups are asked that only one person collects the starting documents in order to reduce the frequency. Moreover, on Thursday evening an additional time slot for accreditation will be set up (see timetable). The organizing staff will wear a mouth and nose protective mask and gloves. Access is generally only possible with a mouth and nose protective mask. A distance of 1.5 meters is to be kept wherever possible.

The final regulations will be available online at [www.engadin-bike-giro.ch](http://www.engadin-bike-giro.ch) from 3 July 2020 and will also be sent by e-mail to all participants in good time before the event.

### **START PROCEDURE / MOUTH AND NOSE PROTECTIVE MASKS**

The minimum distance of 1.5 metres and the general hygiene regulations apply in all event areas. Exceptions to this rule are the formation in the starting block and the race itself. All participants are only allowed to enter the starting area with mouth-and-nose-protective-masks. The mouth-and-nose-protective-mask has to be worn until the start and may only be taken off and stored in the jersey pocket shortly before the starting signal. Please bring your personal mouth and nose protection by yourself. Simple textile masks are sufficient.

The starting field is limited to a maximum of 600 starters and the starting procedure is spatially extended. Elite women and elite men as well as all age groups of the fun-category will start in a separate starting block. This division will be identical on all three race days.

**ROUTE & FEED ZONES**

The organization- staff wears masks and gloves at the feed-zones. The tables and utensils are cleaned and disinfected daily according to the hygiene regulations. In addition, hand-disinfectants will be available at the feed-zones for staff and participants.

**FINISH AREA**

There will be no animation program and no award ceremonies. All material prizes of the Fun-Categories will be sent free of shipping costs after the event respectively the prize money will be transferred to the elite. The final catering after the arrival at the finish line will be arranged with a gate and minimum distance. The mouth-and-nose-protective-mask must be worn again by the participants after the finish and the stay in the finish area should only be as long as necessary.

**SHOWERING/CHANGING**

The showers and changing rooms in the Mulets Sports Centre are generally open with a numerical restriction. However, we recommend, wherever possible, to shower in your own accommodation and avoid the public showers.

**GENERAL**

The BAG's hygiene and distance regulations must be followed throughout the event.

**WRITTEN CONFIRMATION:**

I have taken note of the aforementioned conditions and explicitly confirm that I can fulfil the health declaration listed on page 1.
